

TELESCOPIC WHEEL LOADER | TM320 / TM320S / TM420 / TM420S

Gross power: 97kW/130hp – 129kW/173hp Lift capacity: 3200kg – 4100kg Lift height: 5.2m – 5.45m

THE ARGUMENT FOR BUYING ONE
JUST GOT EVEN **MORE POWERFUL.**

Introducing the all-new JCB TM320, TM320S, TM420 and TM420S Stage V machines. With JCB's proven DieselMAX engine delivering more power and a new highly efficient 8-speed powershift transmission with TorqueLock, they take performance and productivity to another level. With superb visibility, comfort and ease of use plus many innovative fuel saving features, there's so many reasons to choose the ultimate telescopic wheel loaders.

STAGE V

MORE POWERFUL.

OUR NEW JCB STAGE V TM RANGE OF MACHINES ARE OUR MOST POWERFUL YET, WHILST ALSO PROVIDING GREATER TRACTION, RIDE COMFORT AND STABILITY.

Ultimate performance.

1 The new TM machines feature our DieselMAX Stage V emission compliant engine, giving increased performance at low engine speed. This 4.8 litre engine delivers a further increase in engine power and torque over the previous models. The TM320 has 130hp (97kW), while the TM320S and TM420 both have 150hp (112kW). The new flagship model, the TM420S boasts a massive 173hp (129kW) of power.

2 Our unique oscillating centre pivot point makes the most of traction by maintaining even weight distribution over each of the four wheels, providing extra stability and enhanced ride comfort.

3 The JCB TM machines give you ultimate traction and performance in soft ground conditions, thanks to limited slip differential axles and 4WD as standard.

4 New 8-speed powershift transmission with TorqueLock provides a greater range of travel speeds to suit all farm applications. 40kph ECO allows for a fast travel speed at low engine rpm whilst conserving fuel, or new 50kph* travel speed for those customers who want to get from field to farm fast!

*Where legislation allows

GREATER PRODUCTIVITY.

WITH A NEW TRANSMISSION FEATURING TORQUELOCK, IMPROVED LOAD RETENTION AND EASY-TO-USE HYDRAULICS, THE NEW JCB TM MACHINES TAKE PRODUCTIVITY TO ANOTHER LEVEL.

Innovation in action.

1 The new flagship TM420S features twin variable hydraulic pumps delivering greater flow rate at low engine speed for redefined productivity and performance. Using the huge torque reserves of its 129kW/173hp engine, the boom cycle speeds of the standard TM420 are now accessible at a quiet, yet responsive and capable, 1700rpm. Automated engine rpm control with progressive braking also enhances the integration of the new pump, to optimise transmission inching control during multi-functioning.

2 JCB's Auto Smoothride System (SRS) engages at speeds of over 4mph/6kph. This improves load retention and comfort (and in turn, productivity) when travelling at speed on and off road. The system can be manually engaged with the boom in any position. It is easily operated via the B-post mounted switch and can be auto-engaged by travel speed or constantly activated.

3 Our optional Rockinger or hydraulic rear tow hitch further increases machine versatility, whilst its fold-up design prevents impact damage and grounding, when working on gradients or uneven ground.

4 The TM420 and TM420S feature innovative regenerative hydraulics to help to make the most of every drop of precious fuel. Gravitational forces are harnessed to make boom lowering and retraction more energy efficient than ever, allowing the boom to retract and lower in less than five seconds.

5 The TM420 and TM420S feature high flow pipework that gives even greater flow to the boom auxiliaries. This is ideally suited to attachments demanding high flow, such as silage defacers and straw spreaders.

6 Boom end damping on boom lower and extend / retract reduces shock to the operator and the machine itself.

7 The TM's variable flow auxiliary hydraulics are easy to use, designed to maximise productivity and efficiency. This flow sharing system with a variable flow piston pump also allows for multiple functions to be performed at the same time, reducing cycle times.

DESIGNED FOR COMFORT.

WITH ONE OF THE MOST COMFORTABLE CABS ON THE MARKET FEATURING THE LATEST TECHNOLOGY, EASY-TO-USE CONTROLS AND OPTIONAL EXTRAS, WORKING IS A PLEASURE NOT A CHORE.

Work in comfort.

1 The new JCB TM cab has been designed with operator comfort in mind. It provides a spacious working environment with plenty of storage for home comforts and work essentials.

2 Our HVAC system keeps operators comfortable and focused for longer; the 3-speed fan heater can help create the right working temperature all year round, from the depths of winter to hot harvesting days.

3 With a dedicated media port on board, you can be assured of superb connectivity for all of your electronic devices.

Optional radio with Bluetooth connectivity and integrated microphone to aid hands-free calling from your mobile phone with B-post mounted answer/decline and mute switch.

4 For ergonomic, fast and precise control, the TM machines are fitted with a fully proportional single lever mounted servo joystick. Joystick-mounted manual gear changes mean you can shift gears, speed and direction quickly and easily with one

ergonomic control. All models also benefit from automatic gear changes.

5 Electronic park brake offers numerous advantages; it's quick and easy to operate, and frees up space to the left side of the operator for extra storage.

6 B-post mounted backlit switches ensure quick and accurate control recognition, even in the dark.

7 New damped assisted fully adjustable tilt and rake steering column with auto park function makes operator access even easier as well as achieving the correct position for greater comfort.

New Pro Edition pack, combines the S-model features, with additional options that includes; stainless exhaust stack pipe, roof wiper, 360° LED lighting, twin flashing beacons, LED boom lights, Smoothride boom suspension, in-cab storage box, transmission belly guard, hydraulic reverse fan, toolbox, grease gun and Bluetooth radio.

PRO EDITION

Optional heated front screen for faster defrosting in cold climate conditions.

SUPERB VISIBILITY AND EASE OF USE.

WITH INCREASED FORWARD, REARWARD AND UPWARD VISIBILITY AND EASY-TO-USE CONTROLS, THE ADVANTAGES OF USING A JCB TM ARE CLEAR TO SEE.

Better by design.

1 Visibility has never been better, with new seamless one-piece, multi curved glazing that increases front visibility by 13%, providing exceptional upward visibility when operating or loading overhead.

Cab roof FOPS design improves visibility through the roof along with a greater glass surface area of the front windscreen (7% increase), rear quarter windows (9% increase) and roof window (52% increase).

2 Joystick smart key brings all the day-to-day functions directly to your fingertips. It can be programmed to activate any of the following functions: transmission auto/manual, TorqueLock, master work lights, aux changeover front - rear, aux changeover front 1 – 2, radio mute, phone answer/hang-up.

3 Low boom profile and low boom pivot make for superb forward visibility.

4 The console mounted dial allows the operator to infinitely adjust the flow rate to the proportional flow control of the joystick auxiliaries. This ensures that the correct flow rate is achieved to the exact requirements of the attachment. Flow rate is displayed on the in-cab display.

A switchable constant flow mode allows motorised attachments to remain controlled (start and stop) by the ergonomic joystick control, without the need to hold the aux flow switch continuously. Perfect for a straw spreader or yard sweeper.

5 Auxiliary venting now boasts an internal and external cab pressure release button for both the front and rear hydraulic auxiliary. Auxiliary venting can be operated with or without the engine running.

6 A selectable transmission dump on the foot brake provides superb multi-functioning and increased engine speeds during loading or rehandling.

New front screen wiper coverage gives greater forward visibility, whilst new roof wiper option increases visibility when loading at height.

REDUCED COST OF OWNERSHIP.

OUR NEW TM MACHINES HAVE BEEN DESIGNED TO PROVIDE MAXIMUM EFFICIENCY, WITH A NEW TRANSMISSION AND MANY OTHER INNOVATIVE FUEL-SAVING FEATURES.

Economical working.

1 New 8-speed powershift transmission offers smoother transitions as it steps through the gears and delivers TorqueLock, for greater efficiency and improved fuel economy. S-models feature TorqueLock in all gears from 1-8 and 1-4 in reverse, whilst standard models in gears 5-8 only.

2 By producing high levels of power and torque even at engine speeds as low as 1300-1400rpm, JCB's DieselMAX engine can provide fuel-efficient matching of transmission and hydraulics.

3 JCB DieselMAX engines are fitted with a variable speed cooling fan that automatically reacts to ambient temperatures, adjusting fan speed to maximise fuel efficiency and in-cab noise.

4 High back-off power brakes reduce viscous drag during roading and rehandling, which improves fuel economy.

5 All TM's feature load-sensing hydraulics which only consume power on demand, conserving fuel. However the TM420S features twin hydraulic pumps which deliver even greater flow rate at less engine speed, taking efficiency to a new level.

6 New auto engine shutdown feature saves fuel by switching off the engine when the machine is left idling. Idle time can be set by the operator from the cab.

The new 8-speed powershift transmission with TorqueLock provides a greater range of travel speeds to suit all farm applications. It also incorporates a new intelligent autoshift feature that not only ensures the correct gear is selected, but is the most efficient way to carry out the task in hand from both a machine performance and fuel efficiency perspective.

SAFE AND SECURE.

BECAUSE SAFETY AND SECURITY ARE PARAMOUNT ON ANY FARM, JCB TM MACHINES ARE DESIGNED TO PROTECT YOU AND YOUR INVESTMENT 24/7.

Protection when it matters.

1 A rear view camera fitted as standard displays an unobstructed rearward view that you can see on the in-cab colour monitor.

2 Superb visibility in dark conditions is guaranteed with JCB's high intensity 11x LED work lighting package, providing 360 degree illumination.

3 Smart lighting system features: walk me home, automated boom work light activation, auto reverse work lights and headlight main beam assist. Console switch illumination and courtesy step lighting, activated on door opening for night time operation, is made even simpler.

4 The JCB factory-fit key immobiliser option automatically arms itself after a set time following engine shutdown.

5 Our in-cab, electronic 2-stage quickhitch isolation protects against accidental release of attachments.

6 Access in and out of the cab has been improved. Increased cab access area and strategically placed grab handles ensure getting quickly and comfortably into position is safe and simple.

7 Twin line hydraulic trailer braking option for fail-safe braking performance.

8 Hose burst check valves on the rams prevent collapse if a hose fails.

3

5

Our patented Adaptive Load Control System complies with EN15000 and allows the operator to drive seamlessly, without hindering productivity, whilst ensuring machine stability at all times.

In order to protect your investment, JCB LiveLink telematics for real-time vehicle tracking is fitted as standard.

Standard fitment of a reverse alarm on all models.

LIVELINK, WORK SMARTER.

LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MANAGE JCB MACHINES REMOTELY – ONLINE, BY EMAIL OR BY MOBILE PHONE. ACCESS EVERYTHING FROM MACHINE ALERTS TO FUEL REPORTS AND HISTORY INFORMATION, WITH ALL DATA STORED AT A SECURE CENTRE.

Productivity and cost benefits

By providing information like idle time monitoring and machine fuel consumption, JCB LiveLink helps reduce your fuel usage, saving money and improving productivity. Machine location information can help improve efficiency and even reduce insurance costs.

Maintenance benefits

Manage machine maintenance easily – accurate hours monitoring and service alerts improve maintenance planning, while real-time location data helps you manage your fleet. Critical machine alerts and maintenance history records are also available.

Security benefits

LiveLink's real-time geofencing alerts tell you when machines move out of predetermined zones, like the farm yard and real-time curfew alerts inform you of unauthorised usage. Further benefits include real-time location information.

VALUE ADDED.

JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

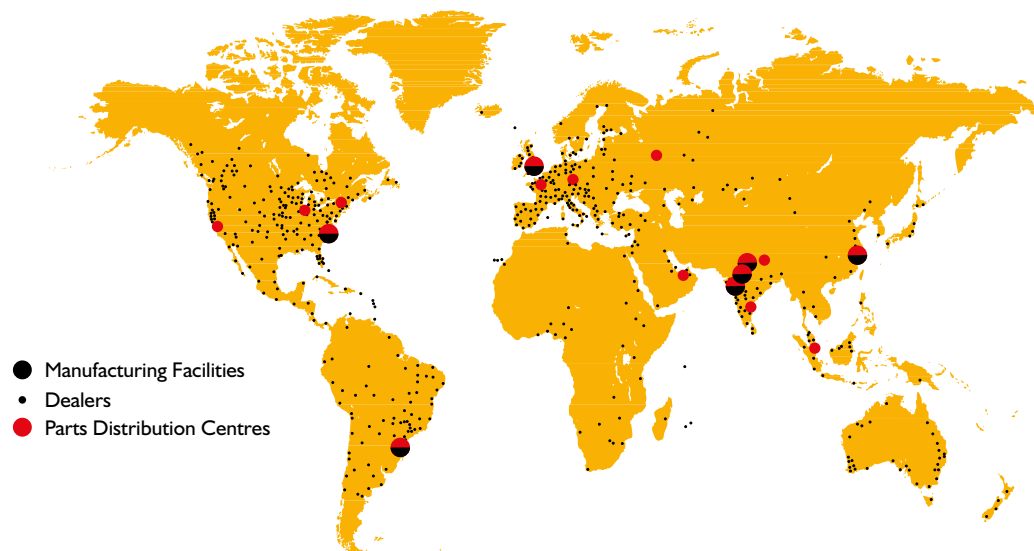

1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

2 The global network of JCB Parts Centres is another model of efficiency; with 18 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

3 JCB offers comprehensive extended warranties as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.
